Helena, Montana 59601

FINAL REPORT

of the

BIMONT
Bicentennial Project/Event
Computerized Calendar System

Submitted to: GOVERNOR THOMAS L. JUDGE
OLD WEST REGIONAL COMMISSION
1977 MONTANA LEGISLATIVE ASSEMBLY

Submitted by:

MONTANA BICENTENNIAL ADMINISTRATION January, 1977

Digitized by the Internet Archive in 2018 with funding from Montana State Library

Montana Bicentennial Administration

Box 1776 Capitol Station

Helena, Mt. 59601

TELEPHONE: (406) 449-3884

To the Old West Regional Commission:

The Montana Bicentennial Administration developed the BIMONT computerized calendar system to satisfy the need for a comprehensive and up-to-date information system for the Bicentennial commemoration. BIMONT effectively provided the MBA and the general public, as well as professional travel and tourist-related organizations, with the details and statistics required of it.

The MBA was able to respond responsibly and rapidly to any and all requests for information about the Bicentennial in Montana. Requests from tourists, businesses and government poured in and were handled within a day due to BIMONT's accurate and accessible printouts.

In all, 2831 projects and activities were recorded in the BIMONT's computers and fed back to us to be forwarded to newspapers, individuals and interested agencies.

This final report on the BIMONT system will satisfy the MBA's responsibility to its principal sponsor - the Old West Regional Commission, which provided the majority of the projects funds.

The MBA will also submit this report to the current Legislative Assembly and the Office of the Governor. Additional copies will be archived with the Montana Historical Society and the State Library.

Respectfully,

John Barrett Director

JOHN S. BARRETT Director

PAUL A. McCANN Deputy Director

JORGE P. URIBE Project Coordinator

GERRI REEVES
Administrative
Assistant

BIMONT SYSTEM DESCRIPTION

The BIMONT Bicentennial Project/Event Calendar System is a user-oriented system which provides detailed project/event information. The project/event information is retrievable through seven separate cross-references:

- 1. Project/Event Title
- 2. County/City/Start Date
- 3. Geographic Scope
- 4. Subject
- 5. Method of Presentation
- 6. Theme
- 7. Start Date

The system can be easily adapted to any computer system which supports ANS COBOL. The Operating Job Control Language is for an IBM System 370/145 with OS/VS1 and can be supplied for any compatible computer system. The system runs in a minimum partition size of 128k. The maximum device allocation requires three tape drives, one disk drive, and one printer.

REPORT ON GRANT BACKGROUND

By late 1974, Bicentennial activities in the Old West Region (Montana, North and South Dakota, Wyoming and Nebraska) were eliciting a great deal of interest from potential tourists both inside and outside of the Region. Travel bureaus and magazines, airlines, AAA, and even other countries were requesting information on the slate of activities planned. At the time, the Montana Bicentennial Administration (MBA) estimated that it had on file nearly 2,000 activities scheduled for celebration of America's Bicentennial in Montana. However, the information relative to these activities was largely in an irretrievable state. Adequate answers to all requests for information and a full presentation of the wide range of alternatives, open to tourists obviously required a computerized calendar system similar to that of the American Revolution Bicentennial Administration's BI-NET system.

The MBA determined after extensive investigation that adoption of the BINET system would not only be prohibitively costly - approximately \$8.00 per record processed by BINET - but that its program did not fit our needs. The Montana State Department of Administration's System Development Bureau then took on the task of designing a calendar system which, through several cross-referencing reports, would provide more information. In June of 1975, Governor Thomas L. Judge presented a proposal for the development of a computerized events information reporting system (BIMONT) to the Old West Regional Commission.

THE BIMONT PROPOSAL

The objective of the computerized calendar system was to provide at minimum cost a simple reporting system for Bicentennial and other tourist-related events. As developed, the BIMONT system would reflect tourist-related information from the Montana Travel Promotion Unit and the state and local chambers of commerce, in addition to Bicentennial information. It would then serve as a demonstration project for the Old West Regional Commission, and could be adopted at a minimal cost by any Old West state for use by their Bicentennial or tourist-related organizations. The adoption of the BIMONT calendar system would provide its user organizations, and ultimately the people served by these organizations, with timely information concerning tourist-related or Bicentennial activities.

Given the virtues of comprehensiveness and efficiency inherent in computerization, the principle feature of the BIMONT is that its design offers the capability of retrieving tourist-related information in formats far superior to any existing system.

The system would produce eight project/event (p/e) information reports. The first, and most important, is the Detailed Information Report, which offers all of the information on file for all p/e. The remaining seven reports are cross references into the first, including Reports by p/e Title, by County/City/Start Date (i.e. location),

by Geographic Scope (of applicability or interest), by Subject, by Method of Presentation, by Theme (Heritage, Festival or Horizons), and by Start Date

Advantages to states adopting the BIMONT system would be that:

- 1. Bicentennial agencies, travel promotion units, and Chambers of Commerce would be able to retrieve comprehensive information about a wide reange of activities on a daily basis;
- 2. at a minimum, they would be able to provide a comprehensive list of activities within any upcoming time period with references to the severn reports described above;
- 3. reproduction of the reports would be extremely cheap; and
- 4. the MBA would provide the BIMONT to Old West States free of charge.

THE GRANT

A grant of \$30,327 was unanimously awarded by the Old West Regional Commission to the MBA to fund the design and implementation of the BIMONT proposal.

The specific requirements of the grant were:

- 1. That the grantee, with the assistance of the State Department of Administration, conduct the technical development of the program, including forms design, system design, programming, unit testing, system tests, and implementation;
- 2. that the grantee inform relevant agencies in the Old West Region states of the program and assist them in making the system compatible with their own computer operations;
- 3. that the grantee perform those tasks necessary to the day-to-day functioning of the system;
- that, using the report printouts, the grantee: a) provide to those Bicentennial planning organizations in the Old West Region who request it, a copy of the 1,000 Register of Activities to be printed, b) maintain a monthly master printout of all eight reports so that requests for specific p/e information could be provided, c)distribute, on a monthly basis, a distillation of the master printout to the Chambers of Commerce, Bicentennial organizations, and news media, d) provide the service of more detailed information on specific projects/events based on reference from the monthly distillation;

THE GRANT

- that the grantee submit to the Old West Regional Commission two copies of a quarterly progress report, beginning December 31, 1975, for the duration of the grant; and
- that the grantee submit to the Commission 15 months from the effective date of the grant (October 15, 1975) 10 copies of a final report which should provide a cumulative financial statement itemizing all costs incurred pursuant to the grant.

The grantee's personnel were to include a Project Director, responsible for the overall supervision of the grant and for maintaining liaison with the Commission's Project Coordinator, and a BI-MONT Coordinator, responsible for managing the project.

The budget which follows was approved within the grant:

 Project Development Costs Monthly Reports BIMONT Coordinator Overhead Travel 	\$ 9,667.00 1,903,00 12,500.00 2,757.00 3,500.00
TOTAL	\$30,327.00

GRANT STATUS

The following report addresses itself to the grant requirements set forth above:

- 1. The technical development of the BIMONT system was completed in conjunction with the State Department of Administration's Systems Development Bureau. This development included forms design, system design, programming, unit testing, system testing, and implementation.
- 2. In December of 1975, after the system was developed and implemented, the MBA informed the Bicentennial Commissions of the Old West states of the BIMONT system and of our incumbency to assist them in adopting it should they so desire. As none of the agencies contacted us, we presented the BIMONT system to to Bicentennial Commission Directors of North and South Dakota, Utah, Colorado, Wyoming and Nebraska at a meeting of the Continental Divide Alliance (American Revolution Bicentennial Administration Region VIII) in February, 1976. Alliance members were impressed with the efficient utility of the BIMONT system, and indicated that they would contact the MBA if, after further consideration of the system, they desired its adaption to their uses.

GRANT STATUS

The Montana Travel Promotion Unit, which had been apprised of the development of the system before the grant was awarded was also approached about adopting it. The system maintenance of approximately \$150 to \$200 per month (to cover the data processing costs of handling input forms and a monthly master report, if desired) was considered to be too costly.

The BIMONT system was re-proposed to the Old West states a final time in the summer of 1976, with the result that none was interested in adopting it.

- 3. The BIMONT system was maintained on a daily basis by three Bicentennial Interns under the supervision of the BIMONT Coordinator. 2,831 activities were recorded on the system. The BI-MONT Coordinator checked information input, output and system efficiency. One design change was made.
- 4. Monthly calendars of events were produced from the master printouts and sent to all Montana news media, Chambers of Commerce, and all State Bicentennial Commissions. A Register of Activities book was likewise sent to each of the above. Requests for information were answered on a daily basis by referring to the master reports.
- Quarterly progress reports were sent to the Commission for the periods of October 15 to December 31, 1975, January 1 to March 31, 1976, April 1 to June 30, 1976, and July 1 to September 30, 1976.
- 6. The final report was submitted in December of 1976 as the MBA closed down its offices before the end of the calendar year.

It should also be noted that the dollar amounts in the Monthly Reports and Travel catagories of the Budget were respectively increased and decreased. As the expense of data processing generally exceeded the originally anticipated amount, as as there were no requests for assistance in adopting the BIMONT system which would have entailed extensive travel, the amounts in the Monthly Reports and Travel categories were amended to \$4,830.00 and \$780.00 respectively.

The BIMONT will be stored on magnetic tape by the State Department of Administration. This Final Report, which included sample printout reports, a system description, and flowchart, explains the BIMONT system and its uses. The tape and Report will be available free to all relevant agencies and organizations in the Old West states in the event they desire to adopt the program.

Montana will certainly find the system useful in planning for the Statehood Centennial in 1989!
